

FABTRON: SADDLE-FITTING MADE AS 'EASY AS A-B-C'

Fabtron's exclusive, new Saddle-Fitting Forms helps eliminate the guesswork in saddle fitting - it's the saddle fitting system that helps guide you, the rider, to the best fit.

Here's how it works: one of three forms will match most of Fabtron's saddle trees. Rent or borrow the forms from your participating dealer and find the form that best fits your horse. Then simply buy the saddle that fits the form.

Fabtron's "A-B-C" Saddle Fitting Forms are custom molded to match the contours of the saddle tree and every Fabtron-built saddle is labeled on the latigo to designate which form matches the tree. That's saddle fitting made easy.

THE BEST TREES:

Fabtron uses the most up-to-date and top-of-the-line saddle trees.

Today's saddle trees offer a new era of design features and construction techniques that affect fit and comfort. Fit and comfort should be

key considerations when buying a new saddle and that's why Fabtron saddles are built on the latest designs and best fitting trees available.

Fabtron's new "A-B-C" Saddle Fitting Forms are custom molded to match the contours of these saddle trees.

THE RIGHT RIGGINGS:

Any saddle needs to be rigged right to ride and perform correctly. Fabtron saddles use the following riggings as indicated in the saddle description.

7/8 Rigged: A favorite of barrel racers and all-around riders, 7/8 position rigging sets the dees back under the stirrup leathers and fenders which positions the saddle more forward on the horse's withers allowing the rider some good close

contact with the horse.

Full Double Rigged:

Widely used by professional riders, full double rigging positions the dee ring directly under the front of the tree while offering the option of using a flank cinch for a fully rigged cinch of the saddle. Also allows one to use a modified center fire position. A favorite of trail riders abroad.

Centerfire Rigged:

Providing what we believe to be the best balance of cinch pressure, the versatile center-fire rigging is the hands-down favorite of the endurance rider.

Look for the A-B-C!

You'll find this emblem on each Fabtron-built saddle in our catalog.
