FABTRON'S

# ONE-PIECE MOLDED 'PROLEAD' USES NO METAL CLAMP

Another Fabtron First!

Part #5502

Fabtron is proud to introduce a new, improved-design premium lead... the Pro-Lead. After two years of design and testing, the Pro-Lead is lighter, tougher, softer, stronger, quieter and neater than leads of years past.

New elastomeric compounds mold with the polypropylene rope under high pressure. This near 'one piece' construction eliminates the metal clamp and any rough rope ends near the snap while providing a better, more ergonomical fit. The solid brass bolt snap allows easy, one-hand use.

*Stronger, Lighter, QUIETER than old-style metal clamped leads*
